

Pallet Wrapping Machine

- PLC control+key board control
- Inverter speed control
- Slow start and stop
- Stop at home position
- Auto detect pallet height
- Foldable tower design
- Front and rear forklift access
- Top sheet option
- Variable turntable and film carriage speed
- Middle reinforce
- Can store 5 recipes

Pre-stretch film carriage

The Film System -

The open-door film holder makes it more convenient to wear the film. The pre-stretching rate can reach 250%, saving material consumption. Maximize the value of stretched film per meter. Standard constant release film. Fixed-point winding and quantitative use of film.

Screen Control -

Parameters can be adjusted from the control panel. Bottom pallet wrapping rounds from 1-10. Top pallet wrapping rounds from 1-10. Rotation speed adjustable from 3 to 10 rpm

Control System -

PLC control system with more stable operation, heavy duty design with rigid machine body. Soft start and soft stop, safety device. After every wrapping work, turntable goes back to home position.

SPECIFICATION	
Model No	XT-4505-2
Description	Turntable pallet wrapper
Power Supply	220V 50HZ 1phase/110V 60hz 1phase
Control System	PLC (Option: touch screen)
Film Carriage	250% Pre-stretch film carriage
Turntable Speed	1-10 cycles/M
Max Pallet Height	2400mm(Option: 2600/3000mm)
Turntable diameter	1500mm (Option: 1650/1800/2000mm)
Turntable height	80mm
Turntable motor	750W
Pre-stretch motor	180W
Lifting Motor	180W
Max Pallet Weight	1500kg
Power	1200W
Machine Weight (NW)	435kg
Machine Dimension (LxWxH)	2455 x 730 x 2200mm

CONTROL PANEL PARAMETER SETTING	
Bottom wrapping cycle	1-9 cycles
Top wrapping cycle	1-9 cycles
Up and down cycle	1-9 cycles
Reinforce cycle	1-9 cycles
Photocell delay time	1-99 seconds

APPLICATION FILM SPECIFICATION	
Film Type	Stretch film machine grade
Film Thickness	17-23mic
Film roll inner diameter	76mm
Film roll outside diameter	250mm
Film width	500mm
Film roll weight	13.8kg
